- B.S.Ingemannsvej 2.Vær 64 6400 Sønderborg

SKILLS

- Problem-Solving
- Programming in various coding languages
- Team collaboration
- Software development

EDUCATION

- Software Engineering
- Southern Denmark University
- 2023 - 2026
- I am currently studying this degree.

LANGUAGES

- English
- German
- Slovak

PROFILE

Experienced professional with a strong background in technical support, software development, and higher education instruction. Skilled in resolving software and hardware issues in banking environments, contributing to game development projects, and teaching advanced programming concepts at the university level. Known for delivering exceptional customer service, fostering collaborative relationships, and driving innovation in cross-functional teams.

WORK EXPERIENCE

Software Programming Instructor

- Southern Denmark University
- Sep 2023 - Present
- Instructional Design: Developing dynamic learning experiences to endorse understanding of advanced programming concepts.
- Advanced Problem-Solving: Guiding students through complex programming challenges to improve critical thinking.
- Object-Oriented Design Principles: Applying principles like encapsulation and inheritance to develop software solutions.
- Project-Based Learning: Providing hands-on experience in designing and implementing advanced software applications.
- Mentorship and Advising: Offering personalized guidance to support students' academic growth.
- Industry Relevance: Integrating industry technologies and best practices into the curriculum.
- Code Review and Feedback: Conducting constructive code reviews to refine students' programming skills.

Student Programmer

- Play eSailing
- Nov 2023 - Present
- Game Development: Contributing actively to the development of fair gameplay experiences, focusing on mechanics, user interface, and performance optimization.
- Programming Skills: Applying expertise in programming languages and tools to implement and refine game features efficiently.
- Team Collaboration: Working closely with artists, designers, and fellow programmers in collaborative teams to drive project progress and foster creative synergy.
- Problem-Solving: Identifying and resolving technical challenges encountered during development with analytical thinking and innovative problem-solving.
- Creative Solutions: Introducing inventive approaches to enhance gameplay mechanics and user interaction, enriching the overall player experience.
- Quality Assurance: Conducting comprehensive testing and debugging to maintain high standards of functionality, stability, and performance.

EXPERTISE

- **Technical Skills:** Proficient in C#, HTML, C++, and Unity for game development.
- **Domain Expertise:** Experienced in game mechanics, UI design, and performance optimization.
- **Soft Skills:** Strong problem-solving, communication, and collaboration abilities.
- **Certifications:** Agile methodologies certified, trained in object-oriented programming and software testing.
- **Industry Knowledge:** Familiar with software engineering best practices and emerging technologies.
- **Problem-Solving:** Skilled in analyzing complex issues and developing innovative solutions.

WORK EXPERIENCE

IT & Innovation, Service Desk

365.bank

Sep 2021 - Jun 2022

- **Technical Support:** Providing prompt and effective technical assistance to bank employees, resolving software and hardware issues to minimize downtime and ensure operational efficiency.
- **Problem-Solving:** Utilizing analytical skills to diagnose and troubleshoot technical problems, identifying root causes and implementing solutions efficiently.
- **Customer Interaction:** Communicating technical information clearly and courteously to non-technical users, guiding them through troubleshooting steps with patience and professionalism.
- **Documentation:** Maintaining thorough documentation of issues and resolutions, ensuring accurate tracking and compliance with bank procedures.
- **Team Collaboration:** Collaborating with colleagues to share knowledge and expertise, contributing to a supportive and cohesive service desk environment.
- **Software and Hardware Knowledge:** Demonstrating proficiency in banking software and hardware systems.
- **Attention to Detail:** Paying close attention to detail in all aspects of service delivery, from initial issue assessment to final resolution and follow-up.
